Let's take a deeper look at the questions, form and test score. Learn about them to learn more about your upcoming wonderlic cognitive ability test: Spatial Reasoning Spatial Reasoning questions evaluate your ability to use logic to discern different patterns. This capability is important in a wide range of fields, such as architecture, design, engineering, and various military positions. You can also apply this skill to everyday office tasks. What's he like? A person with strong spatial reasoning skills will generally have the ability to approach complex situations and find unique solutions in a way that others may not be able to do. Speed questions are generally easy but are thrown at you very quickly. For example, a question can be as simple as what is not food? When answering this question, you should choose from a list of four possibilities, such as cake, banana, dessert, and desert. While we all know that dessert is a food course and desert is a warm area, it can be easy to confuse them under pressure. Oral reasoning oral questions are used to measure candidates' abilities in an office environment. These questions are important because they assess the skills related to the Language. For example, you may be tested in anagrams, an names vs. synonyms, metaphors, and common or common proverbs. In addition, you may be given a suggestion such as: One hand has two monkeys. After reading this statement, you will be asked whether the proposal can be arranged in a correct sentence. Mathematical problems word Questions in this word math problem section will contain a mixture of both long and short word problems. For example, consider this example: On the stock market, four different shares have an average price of \$100 per share. The price of a Drone share is \$70. What is the average price of the three other stocks (not including the Drone stock)? In addition, you need to prepare mentally and be confident in your ability to perform well. All this requires preparation, and that's why I'm here! Take a free practice test before I dive into the contents of the Wonderlic staff test, it's important to have a visual view of what the test looks like. The following illustration shows the main components you should know: the timer in the upper right corner, the navigation buttons that you go back and forth between questions, the multi-selection format that will be dominant throughout the majority of the test. Above, an illustration of the format and appearance of the test. The query consists for demonstration purposes The Wonderlic Personnel Test consists of four general categories: General Knowledge, Abstract Reasoning, Verbal Reasoning, and Numerical Arithmetic The following table shows a basic analysis of each type of question, followed by a more detailed description of each with sample questions. As you can see, there are many kinds of questions to review. General Abstract Reasoning Verbal Reasoning Numerical Reasoning – Finding Errors – Date Recognition – General Events – Spatial Reasoning – 3D Shapes & tiles – Pattern Recognition – Grammar – Proportions – Vocabulary – Synonyms & An names – Sentence Structure & Order – Word scrambles – Abstract Reasoning – Word Problems – Numbering – Fraction Price – Numerical Patterns Some of the questions will test topics such as general knowledge, finding errors, ordering things chronologically and identifying dates. This section controls spatial reasoning, pattern recognition, and the ability to manipulate and visualize 2D and 3D shapes. Verbal reasoning questions test your knowledge of the English language and your logical and abstract reasoning skills. These questions generally consist of grammar, proportions, vocabulary, and conclusions. There will also be questions covering topics such as metaphors, anagrams, word shuffles, sentence shuffles, word groups, and identifying words that are similar or different. You will be asked to identify whether a pair of words are synonyms or each other's an names, or whether they are irrelevant. Other questions will have you rearranged suggestions that may not make sense grammatically. Another type of question will require you to use your abstraction skills: You will be presented with various statements and then asked to conclude whether another statement is true or false based on the original statements. The Numerical Reasoning category will test your mathematical abilities more. Many of these questions are word problems, so they are not only mathematical problems, but they are a combination of words and numbers. They will test your reading comprehension skills in addition to your mathematical abilities. The questions cover topics such as algebra, percentages, proportions, decimal places, and averages. There will also be number series questions, where you will need to look at a series of numbers and figure out which number then comes in the row. These questions will probably be the most difficult and time-consuming questions, especially since you will not be allowed to use a computer. While the material covered by the test is not particularly complex or advanced, the test is difficult due to its time constraints. I recommend getting started by downloading my free Wonderlic practice test, which is offered below to get a sense of the real There are two slightly different versions of the Wonderlic staff test. First, there is the Standard Wonderlic Personal Test (WPT-R), which consists of 50 multiple choice questions and is administered in 12 minutes. This test is usually proctored and will be administered early in your application However, you may need to take the Wonderlic - QuickTest (WPT-Q) personnel test before taking WPT-R. Wonderlic Personal Test - QuickTest (WPT-Q) There is also a smaller version of the test called Wonderlic Personal Test - QuickTest (WPT-Q), which is only 30 questions and takes 8 minutes. WPT-Q is not proctored and is often taken from home, and is generally used as a precursor to WPT-R. This means that you may be asked to take this from home, and only if you do well will you be asked to take WPT-R. The content of the two tests is the same, as they differ only in length, so our practice materials will prepare you for whatever version you get. Go ahead and get my free Wonderlic-style practice test, which includes 30 questions and has an 8-minute timeout. This is basically a simulation of QuickTest (WPT-Q). After completion, you will receive a detailed score report that will tell you how you did it in each topic. You will also be able to check the answers and explanations. In WPT-R, every question is worth 1 point. If you have each question right, you will get a perfect score of 50. On the WPT-Q, each question is worth 1.66 points, which means that a perfect score will still be 50, even if there are only 30 questions. The score for the specific position you are applying for will vary depending on the employer's identity, needs and work available to you. Once you have completed the test, a detailed score report will be automatically sent to the employer for review. This report will show how your score compares to the employer's target score, how well you did compared to the group of candidates competing with you at work, and how well you did compared to the general population of candidates. The average score on the Wonderlic test is 20 correct answers out of 50. The graph below shows you about what a good score is, in terms of the general population. Remember, in the end, a good score depends on what the employer has put in advance when planning the screening process for the position. And here's how the employer will see the final information on their screen: The column on the right will tell the employer whether or not they should continue hiring a candidate. S stands for Strong, M for Medium and W for Weak. Weak.
